

Souderton Area School District is now using Schoology, an integrated learning management system (LMS) which allows students to access course content, use resources, participate in discussions and submit assignments. Schoology enables our students, parents and teachers to engage with learning materials and their school community from the classroom and beyond.

All students this year will receive a Schoology account, which they can access with their district login and password information. In September, parents of students in grades 6-12 will receive login information for their own parent account. Additional details will be provided to help learn how to use Schoology. We are all new to this so please be patient as we learn together.

Schoology, Home Access Center (HAC), and the District Website each provide separate and valuable information for our school community. Parents should note that HAC is our student records system, where official grades, class schedules, and attendance are recorded. The District website is our externally-facing web presence for people interested in learning more about our schools, programs, courses and activities.

Use the following link together to access your child's Schoology account with their login credentials. <https://schoology.soudertonsd.org>

Frequently Asked Questions

Q: What is Schoology?

A: Schoology is a learning management system (LMS), allowing students and teachers to collaborate online. Schoology allows teachers to post assignments and other resources for their classes. Students can access Schoology from any computer or mobile device with Internet access.

Q: What can parents see in Schoology?

A: Parents can view courses, assignments, and calendars for all of their students. Parents cannot view submitted assignments, comments from other children in the class, or feedback provided by teachers.

Q: Why can't I see my student's submitted work in Schoology?

A: Schoology is intended as a collaboration tool for students and teachers. Parents are able to monitor course content and view assignments, but not review a student's submitted work. The best way to get this type of information is to consult with your child or his/her teacher.

Q: What is the difference between Schoology, HAC, and the District website?

A: Schoology is our learning management system, where teachers can post course content, provide resources for students, and review assignments. Home Access Center (HAC) is our student records system that records official grades, class schedules, and attendance. The District website is our externally-facing web presence for people interested in learning more about our schools, programs, courses and activities.

Q: Can I use Schoology on a mobile device or tablet?

A: Apps are available for both iOS and Android devices.

Q: Why can't I see my child's attendance and grades in Schoology?

A: Schoology is not a replacement for Home Access Center (HAC). HAC is our official student records system, and that is where you can find data including your student's attendance, grades, and class schedules.

Q: How do I contact my child's teacher?

A: The best way to contact your child's teacher is via email. To find a teacher's email address, check the directory on the District Website.
